

AHMAD SAJID

THE TECH MASTER

My Biography

I'm Ahmad Sajid, a passionate Full Stack Developer and Creative Technologist with over 5 years of experience building impactful digital products. My journey began with a love for design and innovation, which evolved into crafting AI-driven web apps, mobile experiences, and immersive games. I believe in building technology that feels human — intuitive, fast, and reliable. Whether it's coding, design, or automation, I turn complex ideas into real, working solutions that deliver results and inspire users.

Skill & Interest

Game Development

Full Stack Engineering

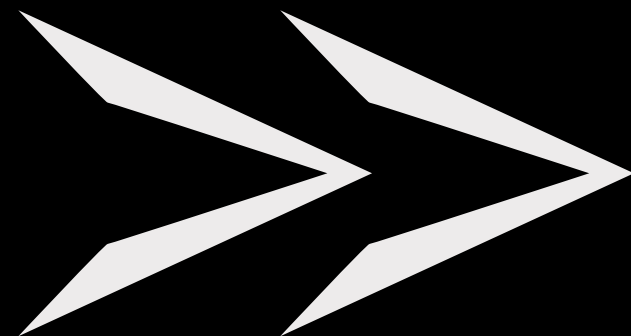

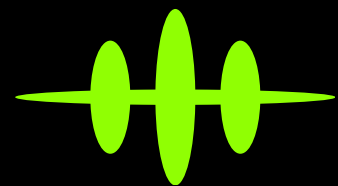

AI & Automation Development

Expertise

I specialize in end-to-end development, from concept to deployment. My skill set includes AI integration, GPT-based chatbots, workflow automation, and full-stack development using React, Node.js, Flutter, and Unreal Engine. I combine creativity with technical precision to produce high-performance applications, seamless user interfaces, and scalable backend systems. My focus is always on quality, innovation, and building solutions that stand out in the modern tech landscape.

I Built My Own ChatGPT! Meet ChatZone AI

Smarter • Faster • Real Chat!

Recent & Selected Project

ChatZone is an advanced real-time communication platform designed to merge modern UI design with powerful AI assistance. Built using React, Node.js, and the OpenAI API, it enables users to chat seamlessly with intelligent GPT-based bots that can remember context, assist with tasks, and provide human-like interaction. The platform supports multi-user chat rooms, media sharing, and responsive layouts optimized for both web and mobile. Designed with scalability and privacy in mind, ChatZone represents my vision of creating an intelligent, user-friendly space where people and AI connect effortlessly.

Cover Intelligent Chat UI & Real-Time Interaction Design

Experience

2025 Qubiq Studio Tech company

At Qubiq Studios, I spearheaded the development of AI and full-stack systems, earning the Best Employee Award for outstanding performance.

- Built and deployed custom GPT chatbots and internal LLM tools, reducing client response time by 30%.
- Developed high-performance web apps using React, Node.js, and Firebase with scalable architecture.
- Created Python automation bots and data-tracking tools for workflow optimization.
- Integrated advanced features into Unreal & Unity projects for seamless tech interaction.

2024 Larace Game Developer

At Larace, I worked as a game developer, blending creativity with performance-driven code to produce immersive experiences.

- Designed and developed interactive gameplay mechanics in Unreal Engine and Unity.
- Focused on 3D environment optimization, animation systems, and cross-platform support.
- Collaborated with designers to ensure smooth integration of assets, physics, and player systems.

2023 Shaheen Gaming World

Delivered end-to-end solutions for multiple clients and self-developed platforms like Drippy (Instagram Clone) and ChatZone (AI Chat Platform).

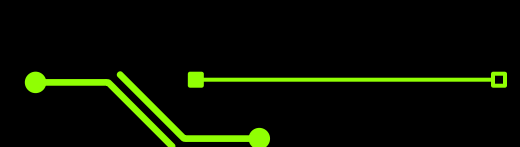

- Built responsive web and mobile apps with React, Node.js, and Firebase.
- Created AI-integrated systems using OpenAI APIs for chat automation and content moderation.
- Focused on clean UI/UX, scalability, and production-ready deployment on Netlify & Hostinger.

Recent & Selected Project

ChainBag Wallet – Blockchain & Web3 Developer

ChainBag is a Web3 wallet application inspired by MetaMask – built to securely manage digital assets, interact with decentralized apps (DApps), and execute blockchain transactions in a smooth, user-friendly interface.

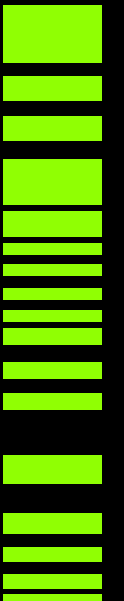

- Developed multi-chain wallet support for Ethereum, Solana, and BSC networks using Web3.js / Ethers.js.
- Implemented secure key storage, custom derivation paths, and private key encryption for user safety.
- Added real-time balance tracking and transaction history sync via blockchain APIs.
- Integrated token claiming and airdrop interaction features using smart contract calls.
- Designed a clean, responsive UI/UX inspired by MetaMask, with built-in dark mode and browser wallet extension compatibility.
- Hosted and deployed front-end on Netlify, ensuring fast performance and scalability.

Drippy – A Modern Social Media Experience

Drippy is a next-generation social media platform where users can share, sell, and buy digital content seamlessly. Designed with a modern, intuitive interface, Drippy combines the creativity of Instagram with the power of blockchain-style content ownership. It empowers creators to monetize their photos, videos, and artwork while offering a smooth and secure user experience.
